

PTC Enterprises

*40 Years of Injection
Molding Experience*

Custom Injection Molding

PTC Enterprises

Thank you for the opportunity to introduce you to our company. We have combined experience of over 40 years in all aspects of custom injection molding. Currently our 30,000 sq. ft. facility houses **18 injection molding machines, including 2 vertical machines, and ranging from 55 to 618 tons.** Please review our equipment list, which is enclosed. We currently employ approximately fifty full time employees. We are constantly expanding our capabilities to better serve and become a full service supplier to all our customers.

PTC-Enterprises supply our customers on a “**just in time**” delivery concept to reduce inventories which in turn allows a savings to our customers.

From a quality assurance standpoint, we do in-house SPC charting and data collection, part weight control, etc. We have a very well equipped and maintained Q.A. Department with a 14” heavy floor model optical comparator with a Quadra-Check 2000 System plus edge finding. We also have a surface plate, height gages, pin gages, depth gages, etc. All of our equipment is set up on a calibration schedule to insure precise and accurate measurements on product produces within our facility. We pride ourselves in knowing that a quality part is being shipped out of our doors.

We also have an excellent tool maintenance program to insure that our customers’ tools will continue to produce top quality parts at an efficient production rate to keep costs down.

We look forward to having you visit with us to see firsthand our capabilities and potential. Please feel free to call us at any time with your inquiries.

Sincerely,

Tom Cape

Owner/President

Quality Certification

Quality Policy
